

Lampiran 7. Hasil Analisis Data Penelitian

Uji Asumsi

1. Uji Normalitas

	Tests of Normality					
	Kolmogorov-Smirnov ^a			Shapiro-Wilk		
	Statistic	df	Sig.	Statistic	df	Sig.
Dukungan suami	,127	61	,016	,954	61	,022
Work-life balance	,096	61	,200 [*]	,964	61	,067

*. This is a lower bound of the true significance.

a. Lilliefors Significance Correction

2. Uji Linearitas

ANOVA Table							
			Sum of Squares	df	Mean Square	F	Sig.
Work-life balance *	Between Groups	(Combined)	39520,601	29	1362,779	2,148	,020
Dukungan suami		Linearity	11048,263	1	11048,263	17,411	,000
		Deviation from Linearity	28472,338	28	1016,869	1,602	,101
	Within Groups		19671,333	31	634,559		
	Total		59191,934	60			

Uji Korelasi (Uji Hipotesis)

Correlations						
Spearmen's rho			dukungan suami	dukungan emosional	dukungan instrumental	WLB
dukungan suami	Correlation Coefficient		1,000	,963**	,931**	,404**
	Sig. (1-tailed)		.	,000	,000	,001
	N		61	61	61	61
dukungan emosional	Correlation Coefficient		,963**	1,000	,812**	,386**
	Sig. (1-tailed)		,000	.	,000	,001
	N		61	61	61	61
dukungan instrumental	Correlation Coefficient		,931**	,812**	1,000	,408**
	Sig. (1-tailed)		,000	,000	.	,001
	N		61	61	61	61
WLB	Correlation Coefficient		,404**	,386**	,408**	1,000
	Sig. (1-tailed)		,001	,001	,001	.
	N		61	61	61	61

** . Correlation is significant at the 0.01 level (1-tailed).

Lampiran 8. Analisis Tambahan (Uji Beda)

Ranks			
	usia subjek	N	Mean Rank
dukungan suami	28-30	10	39,85
	31-40	15	26,03
	41-50	23	28,78
	51-60	13	33,85
	Total	61	
WLB	28-30	10	42,55
	31-40	15	20,10
	41-50	23	33,61
	51-60	13	30,08
	Total	61	

Test Statistics ^{a,b}		
	dukungan suami	WLB
Chi-Square	4,360	10,422
df	3	3
Asymp. Sig.	,225	,015

a. Kruskal Wallis Test

b. Grouping Variable: usia subjek
