INTISARI

Penelitian ini bertujuan untuk mengetahui hubungan antara kualitas persahabatan dan keterlibatan siswa di sekolah pada siswa SMP. Penelitian ini menguji hipotesis yang menegaskan bahwa ada hubungan positif antara kualitas persahabatan dan keterlibatan siswa pada siswa SMP. *Friendship Quality Scale* yang diadaptasi oleh Bangsa dan Qudsi (2017) dari Thien, Razak, dan Jamil (2012) dan *student engagement scale* yang diadaptasi oleh Sa'diah dan Qudsi (2016) dari Fredricks, Blumenfeld, dan Paris (2005) diberikan kepada 266 siswa SMP kelas VII, dan VIII meliputi siswa laki-laki 128 dan perempuan 138 berusia 12-16 tahun. Hasil analisis menunjukkan bahwa kualitas persahabatan secara signifikan berkorelasi dengan keterlibatan siswa di sekolah $r = 0,306$ dan $P = 0,000$ ($P < 0,05$). Data tersebut menunjukkan bahwa terdapat hubungan yang positif antara kualitas persahabatan dan keterlibatan siswa di sekolah yang berarti tingkat kualitas persahabatan siswa berbanding lurus dengan keterlibatan siswa di sekolah.

Kata Kunci : Kualitas Persahabatan, Keterlibatan siswa, Siswa.

**THE RELATIONSHIP BETWEEN FRIENDSHIP QUALITY AND

ABSTRACT

This study aims to find out the relationship between friendship quality and student engagement among junior high school. This study examines the hypothesis that there would be a positive relationship between Friendship quality and student Engagement among junior high school students. The Friendship Quality Scale was adapted by Bangsa and Qudsi (2017) from Thien, Razak, and Jamil (2012) and the scale of student engagement was adapted by Sa'diah and Qudsi (2016) from Fredricks, Blumenfeld and Paris (2005) were administered to 266 seventh and eighth junior high school students includes 128 male students and 138 women 12-16 years old. The results showed that friendship quality significantly correlated with student engagement in school $r = 0.306$ and $P = 0,000$ ($P < 0.05$). The data indicated that there was a positive relationship between friendship quality and student engagement in school which means friendship quality was directly correlated with student engagement.

Keywords: Friendship Quality, Student Engagement, Students.
