KATA PENGANTAR ....................................................................................................... vi
DAFTAR ISI .................................................................................................................... viii
DAFTAR GAMBAR ......................................................................................................... xi
DAFTAR TABEL ............................................................................................................... xii
DAFTAR LAMPIRAN ....................................................................................................... xiii
INTISARI ........................................................................................................................ xiv
ABSTRACT ...................................................................................................................... xv

BAB I PENDAHULUAN .................................................................................................. 1
  1.1. Latar Belakang Masalah ..................................................................................... 1
  1.2. Perumusan Masalah ......................................................................................... 2
  1.3. Tujuan Penelitian ............................................................................................. 2
  1.4. Manfaat Penelitian ......................................................................................... 2

BAB II STUDI PUSTAKA ............................................................................................... 3
  2.1. Tinjauan Pustaka ............................................................................................. 3
  2.1.1. Annona muricata L. .................................................................................. 3
  2.1.2. Antioksidan ............................................................................................... 5
  2.1.3. Flavonoid ................................................................................................. 6
2.1.4. Kuersetin ................................................................. 7
2.1.5. Radikal Bebas ............................................................ 8
2.1.6. Ekstraksi .................................................................. 8
2.1.7. Metode PERENDAMAN Radikal Bebas DPPH .......... 9
2.1.8. Spektrofotometri ......................................................... 11
2.2. Landasan Teori ............................................................. 12
2.3. Hipotesis .................................................................... 13

BAB III METODE PENELITIAN ........................................... 14
3.1. Alat dan Bahan ............................................................. 14
3.1.1. Alat ........................................................................ 14
3.1.2. Bahan ..................................................................... 14
3.2. Alur Penelitian ............................................................ 15
3.3. Cara Penelitian ............................................................ 16
3.3.1. Determinasi Tanaman ............................................. 16
3.3.2. Preparasi Bahan ....................................................... 16
3.3.3. Uji Kadar Air .......................................................... 16
3.3.4. Maserasi ................................................................. 16
3.3.5. Penguapan .............................................................. 17
3.3.6. Uji Kualitatif Flavonoid .......................................... 17
3.3.7. Uji Kuantitatif Flavonid .......................................... 17
3.3.8. Pengukuran Aktivitas Penangkapan Radikal Bebas DPPH .. 18
3.4. Analisis Hasil ............................................................. 20
BAB IV HASIL DAN PEMBAHASAN

4.1. Determinasi Tanaman ................................................................. 21
4.2. Pengeringan Bahan Uji ............................................................... 21
4.3. Uji Kadar Air Serbuk Daun dan Daging Buah Sirsak ................... 23
4.4. Ekstraksi Daun dan Daging Buah Sirsak .................................. 24
4.5. Penguapan .................................................................................. 25
4.6. Uji Kualitatif Flavonoid .............................................................. 26
4.7. Uji Total Flavonoid Sebanding dengan Kuersetin ..................... 26
4.8. Uji Antioksidan Menggunakan Radikal Bebas DPPH ................. 28

BAB V KESIMPULAN DAN SARAN

5.1. Kesimpulan .................................................................................. 31
5.2. Saran ......................................................................................... 31

DAFTAR PUSTAKA .............................................................................. 32
LAMPIRAN .......................................................................................... 35
DAFTAR GAMBAR

Gambar 2.1. Tanaman sirsak (*Annona muricata* L.) ........................................ 3
Gambar 2.2. Tipe antioksidan alami berdasarkan sifat pertahanan in vivo .... 5
Gambar 2.3. Struktur dasar flavonoid .......................................................... 7
Gambar 2.4. Struktur molekul kuersetin ....................................................... 8
Gambar 2.5. Struktur DPPH (2,2-Diphenyl-1-picrylhydrazyl) .................. 10
Gambar 2.6. Mekanisme reaksi penangkapan radikal oleh antioksidan .... 10
Gambar 4.1. Serbuk daging buah sirsak ..................................................... 22
Gambar 4.2. Serbuk daun sirsak ................................................................. 22
Gambar 4.3. Ekstrak kental daun(A) dan daging buah(B) sirsak .......... 25
Gambar 4.4. Hasil uji kualitatif flavonoid ..................................................... 26
Gambar 4.5. Grafik hasil pengukuran absorbansi standar kuersetin ....... 27
DAFTAR TABEL

Tabel 2.1. Tingkat kekuatan antioksidan dengan metode DPPH .................. 9

Tabel 4.1. Hasil uji kadar air serbuk daging buah dan daun sirsak .......... 23

Tabel 4.2. Hasil absorbansi pembacaan spektrofotometer ekstrak saat maserasi ........................................................................................................ 24

Tabel 4.3. Absorbansi larutan seri kadar standar kuersetin......................... 27

Tabel 4.4. Hasil kadar flavonoid ekstrak daging buah dan daun sirsak ....... 28

Tabel 4.5. Perbandingan EC$_{50}$ ekstrak etanol daun dan daging buah sirsak ... 29
