

## Lampiran 5 Dependent Dynamic Analysis Program (DDAP)

### DEPENDENT DYNAMIC ANALYSIS PROGRAM (DDAP)

#### A. Tampilan Program

Program DDAP memiliki tampilan seperti yang ditunjukkan pada Gambar L-5.1 berikut ini.

**Gambar L-5.1 Tampilan DDAP**

Fungsi dari masing-masing *button* adalah:

- Mass, Stiffness, and Damping = Memberikan petunjuk mengenai tata cara input massa, kekakuan, dan redaman struktur.
- Earthquake Load = Memberikan petunjuk mengenai tata cara input rekaman percepatan tanah akibat gempa.
- Unit Load = Satuan percepatan tanah beban gempa yang digunakan.

X Damping Ratio	= Input rasio redaman struktur tinjauan arah x.
Y Damping Ratio	= Input rasio redaman struktur tinjauan arah y.
X EQ Scale	= Input skala beban gempa tinjauan arah x.
Y EQ Scale	= Input skala beban gempa tinjauan arah y.
X Combination	= Input faktor beban gempa tinjauan arah x.
Y Combination	= Input faktor beban gempa tinjauan arah y.
HELP	= Penjelasan mengenai tata cara penggunaan program.
RUN Program	= Menjalankan analisis program.
RUN Chart	= Menampilkan grafik-grafik hasil respons struktur.

## B. CODE PROGRAM

```

function varargout = DDAProgram(varargin)
% DDAPROGRAM MATLAB code for DDAProgram.fig
%   DDAPROGRAM, by itself, creates a new DDAPROGRAM or raises
the existing
%   singleton*.
%
%   H = DDAPROGRAM returns the handle to a new DDAPROGRAM or
the handle to
%   the existing singleton*.
%
%   DDAPROGRAM('CALLBACK', hObject, eventData, handles,...) calls
the local
%   function named CALLBACK in DDAPROGRAM.M with the given
input arguments.
%
%   DDAPROGRAM('Property','Value',...) creates a new DDAPROGRAM
or raises the
%   existing singleton*. Starting from the left, property
value pairs are
%   applied to the GUI before DDAProgram_OpeningFcn gets
called. An
%   unrecognized property name or invalid value makes property
application
%   stop. All inputs are passed to DDAProgram_OpeningFcn via
varargin.
%
%   *See GUI Options on GUIDE's Tools menu. Choose "GUI allows
only one
%   instance to run (singleton)".
%
% See also: GUIDE, GUIDATA, GUIHANDLES

% Edit the above text to modify the response to help DDAProgram

```

```
% Last Modified by GUIDE v2.5 16-Oct-2018 23:02:57
