Model Ragam *Dialog Dashboard Business Intelligence* Surveilans Berbasis *Web* : Studi Kasus Rumah Sakit Umum Islam Harapan Anda Tegal

Surveilans merupakan kegiatan pemantauan secara rutin dengan mengumpulkan data kemudian dikelola dan dianalisis untuk menghasilkan informasi. Fasilitas dan pelayanan kesehatan atau disingkat dengan fasyankes, mempunyai fasilitas Pencegahan dan Pengendalian Infeksi (PPI) yang berlaku di rumah sakit dan fasilitas kesehatan lainnya. PPI harus memberikan keamanan dan kenyamanan menurut SK Menkes No. 382/Menkes/SK/III/2017. Penelitian ini membahas tentang model ragam dialog *dashboard business intelligence* surveilans berbasis *web* dengan studi kasus Rumah Sakit Umum Islam Harapan Anda Tegal. Surveilans yang dimaksud ialah surveilans infeksi yang terjadi pada rumah sakit. Menumpuknya data surveilans berupa laporan yang akan disampaikan kepada direktur rumah sakit menjadi permasalahan tersendiri, permasalahan tersebut terdiri dari: 1. Tidak dapat menampilkan laporan secara *real time*. 2. Tidak dapat menyajikan laporan untuk pengawasan dan *monitoring* secara terus- menerus (setiap hari). 3. Keterlambatan evaluasi kinerja tim PPI disebabkan permasalahan 1 dan 2. Penggunaan *dashboard business intelligence* dapat engatasi permasalahan tersebut. Penggunaan model ragam dialog sebagai model interaksi antara manusia dan komputer memudahkan pemilihan *dashboard* yang akan digunakan oleh direktur rumah sakit. Tujuan yang dicapai dalam penelitian yaitu memberikan tampilan visual laporan surveilans berupa *dashboard business intelligence* berbasis *web*, yang berisi informasi laporan data surveilans secara *real time* dan secara terus – menerus (setiap hari) yang dapat memberikan alternatif solusi masalah pengawasan dan melakukan monitoring serta evaluasi kinerja tim PPI. Metode yang digunakan pada penelitian menggunakan *evolutionary prototype* dengan instrumen penelitian wawancara. Kesimpulan: model ragam dialog *dashboard business intelligence* surveilans berbasis *web* pada temuan iterasi yang kedua, dapat menunjukkan informasi laporan data surveilans secara *real time* dan secara terus – menerus (setiap hari).
