**ABSTRACT**

*Muslims should have high motivation to recite the Qur'an. Students who have high motivation in reciting Al-Qur'an will be easier to recite Al-Qur'an so that they are able to fulfill their obligations at school and succeed in achieving the targets set by the school. But in fact, students who reciting Al-Qur'an often have problems associated with motivation to recite the Qur'an. Decreased motivation to recite the Qur'an occurs due to lack of parental support. This research was aimed to understand the correlation between the perception of parental support and Al-Qur'an reciting motivation among Islamic junior high school students in Yogyakarta. The subject of this research were 136 students. This research used two questionnaires as measurement tools, namely Social Provision Scale (SPS) and Al-Qur'an reciting motivation scale. The data analysis used Spearman correlation method. These findings indicate that the perception of parental support is significantly positively associated with Al-Qur'an reciting motivation among Islamic junior high school students. The correlation between father's support and Al-Qur'an reciting motivation was  $r = 0,202$  and  $p = 0,009$  ( $p < 0,01$ ) and the correlation between mother's support and Al-Qur'an reciting motivation was  $r = 0,313$  and  $p = 0,000$  ( $p < 0,01$ ).*

***Keywords : perception of parental support, Al-Qur'an reciting motivation, Islamic junior high school students***

**PERSEPSI TERHADAP DUKUNGAN ORANGTUA DAN MOTIVASI  
MENGHAFAL AL-QUR'AN PADA SISWA SMP ISLAM DI  
YOGYAKARTA**

**INTISARI**

Umat Islam seharusnya memiliki motivasi yang tinggi untuk menghafalkan Al-Qur'an. Siswa yang memiliki motivasi yang tinggi akan mudah menghafalkan Al-Qur'an sehingga mampu memenuhi kewajiban di sekolah dan berhasil mencapai target yang telah ditetapkan oleh sekolah. Namun pada kenyataannya, siswa penghafal Al-Qur'an seringkali mengalami masalah terkait dengan motivasi menghafal Al-Qur'an. Menurunnya motivasi menghafal Al-Qur'an terjadi karena kurangnya dukungan orang tua. Penelitian ini bertujuan untuk memahami hubungan antara persepsi terhadap dukungan orang tua dan motivasi menghafal Al-Qur'an pada siswa SMP Islam di Yogyakarta. Responden dalam penelitian ini adalah 136 siswa. Penelitian ini menggunakan dua kuesioner sebagai alat ukur, yaitu *Social Provision Scale* (SPS) dan skala motivasi menghafal Al-Qur'an. Analisis data menggunakan metode korelasi Spearman. Hasil penelitian menunjukkan bahwa terdapat hubungan positif yang signifikan antara persepsi terhadap dukungan orang tua dan motivasi menghafal Al-Qur'an pada siswa SMP Islam. Korelasi antara persepsi terhadap dukungan ayah dan motivasi menghafal Al-Qur'an adalah  $r = 0,202$  dan  $p = 0,009$  ( $p < 0,01$ ). Sedangkan korelasi antara persepsi terhadap dukungan ibu dan motivasi menghafal Al-Qur'an adalah  $r = 0,313$  dan  $p = 0,000$  ( $p < 0,01$ ).
