Perhitungan DA dan DM :

- $PS = (0,3\text{kg} \times 50 \text{ kain/bulan})/1000$
= 0,015 ton/bulan
- $DM = 150 \text{ m}^3/\text{ton} \times (0.3 \text{ kg/kain} \times 50 \text{ kain/bulan})$
= $150 \text{ m}^3/\text{ton} \times 0.015 \text{ ton/bulan}$
= $2.25 \text{ m}^3/\text{bulan}$
- $DA = (0,005 \text{ m}^3/\text{kain} \times 50 \text{ kain/bulan})$
= $0,25 \text{ m}^3/\text{bulan}$
