Perhitungan BPM dan BPA parameter seng (Zn) :

- $$\text{BPM} = (\text{CM})_j \times \text{Dm} \times f$$

$$= 10 \times 150 \times 0,001 = 1,5 \text{ mg/l}$$
- $$\text{BPA Naptol} = (\text{CA})_j \times (\text{DA/Ps}) \times f$$

$$= 1,3641 \times (0,2/0,015) \times 0,001 = 0.022690167$$
- $$\text{BPA Indigosol} = (\text{CA})_j \times (\text{DA/Ps}) \times f$$

$$= 0,702125 \times (0,2/0,015) \times 0,001 = 0.011702083$$
