Daftar Publikasi............................................................................................. vi
Halaman Kontribusi...................................................................................... vii
Halaman Persembahan.................................................................................... viii
Kata Pengantar.............................................................................................. ix
Daftar Isi......................................................................................................... xi
Daftar Tabel.................................................................................................. xiii
Daftar Gambar............................................................................................... xiv
Glosarium..................................................................................................... xv

BAB I PENDAHULUAN....................................................................................... 1
  1.1 Latar Belakang Masalah................................................................. 1
  1.2 Rumusan Masalah............................................................................ 3
  1.3 Batasan Masalah............................................................................... 3
  1.4 Tujuan Penelitian............................................................................ 4
  1.5 Manfaat Penelitian.......................................................................... 4
  1.6 Sistematika Penulisan...................................................................... 4

BAB II TINJAUAN PUSTAKA.............................................................................. 6
  2.1 Landasan Teori.................................................................................. 6
    2.1.1 Business Intelligence......................................................... 6
    2.1.2 Power BI.............................................................................. 11
    2.1.3 Microsoft SQLServer.................................................... 14
    2.1.4 Evaluasi Sistem Informasi............................................... 15
    2.1.5 Standar Pelayanan Mutu (SPM) Rumah Sakit.................. 17
  2.2 Tinjauan Pustaka.............................................................................. 19

BAB III METODOLOGI PENELITIAN............................................................. 27
  3.1 Desain dan Langkah-langkah Penelitian...................................... 27
  3.2 Subjek dan Objek Penelitian......................................................... 44

BAB IV HASIL DAN PEMBAHASAN.......................................................... 45
4.1 Hasil Identifikasi Masalah......................................................................................45
4.2 Rencana Kerja Evaluasi..........................................................................................45
4.3 Hasil Perancangan Business Intelligence..............................................................48
4.4 Hasil Evaluasi.........................................................................................................64
BAB V KESIMPULAN DAN SARAN.......................................................... 71
  5.1 Kesimpulan.............................................................................................................71
  5.2 Saran....................................................................................................................... 71
DAFTAR PUSTAKA......................................................................................................... 72
LAMPIRAN ....................................................................................................................... 75
Daftar Tabel

Tabel 2.1 Perbedaan antara Sistem BI dan Sistem Aplikasi pada Umumnya.........................7
Tabel 2.2 Perbandingan aplikasi Business Intelligence.........................................................10
Tabel 2.3 Perbandingan Pemetaan Penelitian Terdahulu dan Usulan...............................26
Tabel 3.1 Pemetaan Tabel Dimensi ke Tabel Fakta...............................................................32
Tabel 3.2 Standar ALOS untuk diagnosis tertentu ...............................................................41
Tabel 3.3 Tabel Nilai Skala Likert.........................................................................................43
Tabel 4.1 Tabel Kuesioner SUS..........................................................................................47
Tabel 4.2 Data-data dalam tabel dw_bangsal.......................................................................49
Tabel 4.3 Data-data dalam tabel dw_penyakit.......................................................................51
Tabel 4.4 Data-data dalam tabel dw_cp...............................................................................51
Tabel 4.5 Lembar kuesioner yang akan diisi oleh pengguna...............................................64
Tabel 4.6 Hasil penilaian kepala bidang perencanaan.........................................................65
Tabel 4.7 Rekap hasil penilaian pengguna..........................................................................67
Tabel 4.8 Rekap nilai responden.........................................................................................68
Daftar Gambar

Gambar 2.1 Langkah-langkah Proses BI ................................................................................8
Gambar 2.2 Tampilan Awal saat Membuka Power BI ...........................................................12
Gambar 2.3 Tampilan Pilihan Sumber Data pada Power BI ......................................................13
Gambar 2.4 Pengisian Nama Server dan Data Warehouse .......................................................13
Gambar 2.5 Tampilan Halaman Kerja Power BI .......................................................................14
Gambar 2.6 Dasar Penilaian SUS Score..................................................................................17
Gambar 3.1 Alur Metode Penelitian ......................................................................................27
Gambar 3.2 Arsitektur Fisik Pengembangan Business Intelligence .........................................30
