

Lampiran 6 : Perhitungan Persentase Komposisi Terpilah Stasiun Lempuyangan

a. Menghitung persentase sampah

$$\begin{aligned}\% \text{ layak jual} &= \frac{\text{Rata - rata berat layak jual (17,15)}}{\text{Rata - rata berat total (25,145)}} \times 100 \\ &= 68\%\end{aligned}$$

*% layak kompos*

$$= \frac{\text{Rata - rata berat layak kompos (4,08)}}{\text{Rata - rata berat total (25,145)}} \times 100 = 16\%$$

*% layak buang*

$$= \frac{\text{Rata - rata berat layak buang (3,92)}}{\text{Rata - rata berat total (25,145)}} \times 100 = 16\%$$
