

Lampiran 7 : Perhitungan Persentase Komposisi Terpilah Stasiun Tugu

a. Menghitung persentase sampah

$$\begin{aligned}\% \text{ layak jual} &= \frac{\text{Rata - rata berat layak jual (15,92)}}{\text{Rata - rata berat total (21,94)}} \times 100 \\ &= 73\%\end{aligned}$$

$$\begin{aligned}\% \text{ layak kompos} \\ &= \frac{\text{Rata - rata berat layak kompos (3,08)}}{\text{Rata - rata berat total (21,94)}} \times 100 = 14\%\end{aligned}$$

$$\begin{aligned}\% \text{ layak buang} \\ &= \frac{\text{Rata - rata berat layak buang (2,95)}}{\text{Rata - rata berat total (21,94)}} \times 100 = 13\%\end{aligned}$$
