DAFTAR TABEL ............................................................................................................. xiv
DAFTAR GAMBAR ......................................................................................................... xv

BAB I PENDAHULUAN ............................................................................................... 1
  1.1 Latar Belakang .................................................................................................... 1
  1.2 Rumusan Masalah .............................................................................................. 2
  1.3 Batasan Masalah ................................................................................................. 3
  1.4 Tujuan Penelitian .............................................................................................. 3
  1.5 Manfaat Penelitian ............................................................................................ 4
  1.6 Metodologi Penelitian ....................................................................................... 5
    1.6.1 Pengumpulan Data ...................................................................................... 5
    1.6.2 Analisis Kebutuhan .................................................................................... 5
    1.6.3 Perancangan Aplikasi ............................................................................... 5
    1.6.4 Implementasi ............................................................................................. 5
    1.6.5 Pengujian Sistem ...................................................................................... 6
  1.7 Sistematika Penulisan ....................................................................................... 6

BAB II LANDASAN TEORI .......................................................................................... 8
  2.1 Komputer Forensik ............................................................................................ 8
  2.2 Bukti Digital ....................................................................................................... 8
  2.3 Metadata .............................................................................................................. 9
2.4 *Dublin Core* .......................................................................................................................... 9
2.4 XML (Extensible Markup Language) ......................................................................................... 12
2.5 FITS (File Information Tool Set) .............................................................................................. 13
  2.5.1 Gambaran Alur Kerja FITS .............................................................................................. 13
  2.5.2 Penggunaan FITS ............................................................................................................. 14
  2.5.3 *Output* FITS .................................................................................................................. 14

**BAB III METODOLOGI PENELITIAN** .................................................................................. 15
3.1 Metode Analisis .................................................................................................................. 15
3.2 Analisis Kebutuhan Sistem .................................................................................................... 15
  3.2.1 Analisis Kebutuhan *Input* ........................................................................................... 16
  3.2.2 Analisis Kebutuhan Proses ............................................................................................ 16
  3.2.3 Analisis Kebutuhan Output ........................................................................................... 16
  3.2.4 Analisis Kebutuhan Perangkat Antarmuka ................................................................... 17
  3.2.5 Analisis Kebutuhan Perangkat Lunak ........................................................................... 17
  3.2.6 Analisis Kebutuhan Perangkat Keras .......................................................................... 18
3.3 Metode Perancangan Sistem .................................................................................................. 18
3.4 Perancangan Antar Muka ....................................................................................................... 20
  3.4.1 Rancangan Halaman *Home* ......................................................................................... 20
  3.4.2 Rancangan Halaman *Form* .......................................................................................... 20
  3.4.3 Rancangan Halaman *Upload* ....................................................................................... 21
  3.4.4 Rancangan Halaman Hasil ............................................................................................. 22
  3.4.5 *Flowchart* Penggunaan Sistem ................................................................................... 22

**BAB IV HASIL DAN PEMBAHASAN** ................................................................................ 23
4.1 Skenario Pengujian ............................................................................................................... 23
4.2 Proses Ekstraksi Metadata .................................................................................................... 24
  4.2.1 Ekstraksi Metadata dengan FITS ................................................................................... 25
    4.2.1.1 Script XML Hasil Ekstraksi File .JPG ....................................................................... 26
    4.2.1.2 Script XML Hasil Ekstraksi File .MP3 ..................................................................... 27
    4.2.1.3 Script XML Hasil Ekstraksi File .DOC ................................................................. 28
4.2.1.4 Script XML Hasil Ekstraksi File .PDF................................. 29
4.3 Kesimpulan Hasil Keluaran FITS .................................................. 30
4.4 Pengujian Sistem yang dibangun .................................................. 30
  4.4.1 Antarmuka Halaman Home ................................................. 30
  4.4.2 Antarmuka Halaman Input Data Investigator ......................... 31
  4.4.3 Antarmuka Halaman Upload .............................................. 32
  4.4.4 Antarmuka Halaman Hasil ............................................... 33
  4.4.5 Halaman Hasil dalam Tabel ............................................ 34
  4.4.6 Dokumentasi hasil uji sample ........................................ 36
  4.4.7 Halaman Hasil Save PDF .............................................. 37
4.5 Kelebihan dan Kekurangan Sistem ............................................. 37

BAB V KESIMPULAN DAN SARAN .................................................. 39
  5.1 Kesimpulan ........................................................................ 39
  5.2 Saran .............................................................................. 39

DAFTAR PUSTAKA .................................................................... 40
