

## CHAPTER V

### CONCLUSION AND RECOMMENDATION

This chapter describes the summary of the research based on research findings in previous chapter and recommendation for further research.

#### 5.1. Conclusion

The purpose of this study was to identify students' perceptions of the use of jigsaw as one of the activities in the cooperative learning method. There were 70 students who participated to fill in the questionnaires. The conclusion in this study is students agree that cooperative learning method help them in gaining knowledge through working in a team, communication skill and leadership. The statement "This approach helps me to acquire knowledge through working in a team" by the result Mean= 4.07 and SD= 0.72. However, the limitation of the cooperative learning statements is the approach cannot always help students achieve learning goal. The statements "This approach helps everyone reach the goal equally" has the lowest score that is 3.67 (Mean) and 0.77 (SD). The recommendation for this research is it is important to investigate more about how cooperative can help students to achieve learning goal.
