

ABSTRAK

PENGARUH MOTIVASI MAHASISWA PAI FIAI UII YANG AKTIF DI LDK KODISIA TERHADAP INTENSITAS IBADAH SHALAT

Oleh:

Muchamad Amirul Fahmi

Penelitian ini dilatar belakangi oleh fenomena ketika Mahasiswa Program studi PAI di proyeksikan menjadi seorang guru Pendidikan agama Islam dan dai dimasyarakat dalam menyiaran nilai-nilai Islam. Namun fakta yang terjadi di lapangan ditemukan bahwa mahasiswa PAI memiliki minat yang lebih sedikit dalam mengikuti Organisasi Dakwah dibandingkan dengan program studi yang lainnya. Padahal kegiatan dakwah sangat membutuhkan tenaga dan kontribusi dari mahasiswa PAI yang mempunyai latar belakang dalam bidang agama dan dituntut untuk aktif, mampu memotivasi untuk giat berdakwah dan meningkatkan ibadah khususnya seperti ibadah sholat, namun kenyatanya masih menemukan mahasiswa Pendidikan agama Islam didalam kampus yang tidak mengikuti organisasi dakwah, tidak menyegerakan shalat atau menunda seperti selesai kuliah, bermain diluar dan sebaliknya mahasiswa yang aktif dilembaga dakwah ketika mendengarkan adzan, bersegera melaksanakan shalatnya, aktif mengajak dan selalu berjamaah dimasjid. Jadi asumsi penulis bahwa motivasi mahasiswa yang aktif di lembaga dakwah berperan dalam pelaksanaan ibadah shalat mahasiswa.

Penelitian ini menggunakan pendekatan kuantitatif. Jenis penelitian ini adalah penelitian Populasi. Subjek penelitian ini diambil dari mahasiswa/i PAI FIAI UII yang aktif di Ldk Kodisia sejumlah 16 mahasiswa. Lokasi penelitian ini dilakukan di Ldk Kodisia UII. Teknik pengumpulan data menggunakan angket yang sudah teruji validitas dan reliabilitasnya. Teknik analisis data diolah dengan bantuan komputer program SPSS versi 23 *for windows*.

Berdasarkan hasil penelitian, analisis data dan pembahasan, maka peneliti berkesimpulan bahwa terdapat pengaruh positif yang signifikan dalam Motivasi mahasiswa PAI yang aktif LDK Kodisia terhadap Intensitas Ibadah Shalat. Hal ini dibuktikan dengan hasil perhitungan nilai pada nilai (*R*) dengan sebesar 0,553 Hal tersebut menunjukkan hubungan sedang. Selain itu juga diperoleh tingkat Motivasi mahasiswa PAI yang aktif di LDK Kodisia presentase tertinggi dengan kategori sedang sebesar 56,3% dan tingkat Intensitas Ibadah Shalat presentase tertinggi dengan kategori sedang sebesar 75,0%. Angka koefisien determinasi *R Square* sebesar 0,306, angka ini menunjukan bahwa pengaruh Motivasi mahasiswa PAI yang aktif LDK Kodisia terhadap Intensitas Ibadah Shalat adalah 30,6% dan sisanya yaitu 69,4% adalah pengaruh yang belum diteliti oleh penulis.

Kata kunci: Motivasi, Ibadah Shalat

ABSTRACT

THE INFLUENCE OF PAI FIAI UII STUDENT MOTIVATION THAT IS ACTIVE IN LDK KODISIA ON INTENSITY OF Worship Prayers

By:

Muchamad Amirul Fahmi

This research is motivated by the phenomenon when the PAI study program student is projected to become a teacher of Islamic religious education and preachers in the community in broadcasting Islamic values. But the fact that happened in the field was found that PAI students had less interest in joining the Da'wah Organization compared to other study programs. Though preaching activities really need energy and contributions from PAI students who have backgrounds in the field of religion and are required to be active, able to motivate to be active in preaching and increase worship, especially such as prayer services, but in fact still find Islamic Religious Education students on campus who do not join the organization preaching, not hastening prayer or postponing such as after college, playing outside and vice versa students who are actively institutionalized preaching when listening to the call to prayer, immediately perform the prayer, actively inviting and always worshiping at the mosque. So the author's assumption that the motivation of students who are active in the Da'wah institution plays a role in the implementation of student prayer services.

This study uses a quantitative approach. This type of research is Population research. The subjects of this study were drawn from students of PAI FIAI UII who were active in Ldk Kodisia with a total of 16 students. The location of this research was conducted at the Ld Kodisia UII. Data collection techniques used a questionnaire that had tested its validity and reliability. Data analysis techniques were processed with the help of a computer program SPSS version 23 for windows. Based on the results of the study, data analysis and discussion, the researchers concluded that there was a significant positive effect on the motivation of the active PAI students LDK Kodisia on the Intensity of Praying. This is evidenced by the results of the calculation of the value of the value (R) by 0.553 This shows a moderate relationship. Besides that, the highest percentage of PAI students who were active in LDK Kodisia was in the medium category with a moderate category of 56.3% and the highest percentage of prayer worship intensity with a medium category of 75.0%. R Square determination coefficient figure of 0.306, this figure shows that the influence of PAI active students of LDK Kodisia active on the Intensity of Prayers is 30.6% and the remaining 69.4% is an influence that has not been examined by the author.
