## **ABSTRACT**

The purpose of this research is to know the relation between self control and narcissism tendency on student SMAN 2 Ngaglik. The hypothesis there is a relationship between self control and narcissism tendency in SMAN 2 Ngaglik. Where the relationship was negative and significant relationships. The analysis of data used to test the hypothesis in this study was the product moment correlation ( $r$ ) of Karl Pearson to the result  $p = 0.328$  and  $r_{xy} = -0.696$  which indicates that there is a negative correlation between narcissistic tendencies and self control ( $p > 0.05$ ), whereas for the t test results was  $p < 0.01$ . Therefore, the hypothesis was **confirmed**.

**Keywords:** self-control, trends in adolescent narcissistic.
