INTISARI

Penelitian ini bertujuan untuk mengetahui hubungan antara keterlibatan orangtua dan *student engagement* pada siswa SMA/Sederajat. Populasi penelitian ini adalah siswa SMK Negeri 1 Banda Aceh dengan jumlah 105 siswa. Hipotesis dalam penelitian ini adalah akan terdapat hubungan positif antara keterlibatan orangtua dan *student engagement* pada siswa SMA. Untuk menguji hipotesis penelitian, peneliti melakukan pengambilan data menggunakan skala *student engagement* yang diadaptasi dari *School Engagement Scale* dan skala keterlibatan orangtua. Hasil penelitian menunjukkan ada hubungan antara keterlibatan orangtua dan *student engagement* pada siswa SMA/Sederajat. Analisis korelasi menunjukkan nilai koefisien $r = 0.546$ dengan signifikansi $p < 0,000$ sehingga hipotesis diterima.

Kata kunci : *Student engagement*, keterlibatan orangtua, siswa, SMA/Sederajat

THE RELATIONSHIP BETWEEN PARENTAL INVOLVEMENT AND STUDENT ENGAGEMENT AT HIGH SCHOOL/EQUIVALENT STUDENTS

ABSTRACT

This research aimed to examine the relationship between parental involvement and student engagement on high school students/equivalent. The subjects of this research are 105 SMK Negeri 1 Banda Aceh students. The hypothesis proposed is there would be a positive relationship between parental involvement and student engagement on high school students/equivalent. The researcher used a scale of student engagement adapted from school engagement scale and a parental involvement scale. The results showed a correlation between parental involvement and student engagement on high school students/equivalent. Correlational analysis showed a value of coefficient $r = 0.546$ with $p < 0,000$ significance, hence the hypothesis is accepted.

Keywords: Student engagement, parental involvement, students, high school/equivalent.
