

Abstract

This study aims to examine and analyze the factors which affect the financial statement fraud. There are five factors used in this research, which were Target Finance, Sharia Supervisory Board, Auditor Change, Board Change as well as CEO's change. Population in this study was banking that registered in General Sharia Bank (GSB) in 2011-2016. The sampling method used in this research was purposive sampling method. The results showed that the target finance, auditor turnover, and CEO image had a positive effect on financial reporting fraud, while the change of board directors and sharia supervisory board had no effect on the fraudulent financial report. Targeted financial variables, auditor changes, and CEO images based on the results of the study exemplified that these three factors reassure the financial reporting fraud. The results indicated that Sharia supervisory board had a positive effect on financial reporting fraud. Meanwhile, the coefficient direction indicated that DPS should minimize the occurrence of fraudulent financial statements. However, the result of the study revealed the Sharia supervisory board improves the quality of fraud.
